About me

As a CTO and experienced full-stack developer, I bring 8+ years of expertise in backend and frontend development, as well as DevOps with a primary focus on AWS. I am an organized and driven team player, blending logic with creativity to deliver results. My advanced proficiency in NodeJs, Go, JavaScript (TypeScript), HTML5, CSS3, React.js, and Gatsby.js enables me to develop innovative and scalable solutions for complex challenges. Let's connect and explore how I can contribute to your next project.

Work

03/2021 - Present

Software developer & Web designer

Freelance | Full-time Berlin, <u>www.hinterland.software</u>

06/2022 - Present

Chief Technology Officer | HERMONE

Freelance | Part-time Berlin, <u>hermone.health</u>

06/2019 - 03/2021

FullStack JS developer | Contentful GmbH

Employed | Full-time Berlin, www.contentful.com

01/2018 - 06/2019

Software developer | MYCS GmbH

Employed | Full-time Berlin, <u>www.mycs.com</u>

01/2017 - 01/2018

Working student | MYCS GmbH

Employed | Part-time Berlin, <u>www.mycs.com</u>

08/2015 - 01/2018

Working student | GIGA

Employed | Part-time Hamburg, <u>www.giga-hamburg.de</u>

04/2014 - 03/2021

Software developer & Web designer

Freelance | Part-time Berlin, www.hinterland.software

02/2014 - 04/2014

Photographer | adP Photostudios GmbH

Employed | Full-time Hamburg, <u>www.adp-photostudios.de</u>

Selected projects

Interim Chief Technology Officer

06/2022 - Present, Freelance | Part-time

Served as Interim CTO for a Femtech company, where I was responsible for planning and implementing AWS server-less infrastructure, developing a React Native app, providing strategic consulting, and managing the project.

AWS API Gateway, AWS AppSync, AWS CloudFront, AWS DynamoDB, AWS ECS, AWS Fargate, AWS Lambda, AWS S3, Architecture, CDK, Contentful, Docker, GitHub Actions, GraphQL, Project Management, React Native, Serverless

CMS Migration Project

2021 - 2023, Freelance | Full-time

Successfully migrated a prominent news organization from a legacy CMS to Contentful. The comprehensive project involved transferring vast content, developing custom frontend applications, and crafting backend solutions. Additionally, the project leveraged AWS Terraform for infrastructure management and integrated GitHub Actions to establish a streamlined CI/CD pipeline.

 $AWS, Contentful, GitHub\ Actions, NodeJs, ReactJs, Terraform, Type-Script$

Website for Research Institute

06/2021 - 01/2022, Freelance | Full-time

Conception and development of a fail-safe website linked with a research information system. Data is automatically fed into a CMS, manually enriched, and displayed on the website, utilizing technologies such as GatsbyJs, ReactJs, TypeScript, AWS services, and Docker.

AWS API Gateway, AWS CloudFront, AWS ECS, AWS Fargate, AWS Lambda, Docker, GatsbyJs, NodeJs, Pure API, ReactJs, Serverless, TypeScript

Migration of Legacy AngularJS to ReactJS

03/2020 - 03/2021, Employed | Full-time

Migration of a substantial legacy AngularJS codebase to ReactJS, utilizing TypeScript and modern development practices to enhance maintainability and performance.

Angular, ReactJs, TypeScript

Automated Label Printing through API Design

01/2019 - 03/2019, Employed | Full-time

Designed and implemented a specialized API to enhance warehouse operations. This system streamlined the label printing process, integrating seamlessly with existing management systems. As a result, manual interventions were minimized and errors reduced in order processing.

AWS, CircleCi, Go, IoT, NodeJs, PostgreSQL

Cloud Container Orchestration Integration

03/2018 - 07/2018, Employed | Full-time

Established and integrated both EKS and ECS cloud container orchestration services, streamlining the migration of existing APIs. This initiative enhanced the scalability and reliability of our system infrastructure.

AWS, Bash, Docker, Kubernetes

CI/CD process NetSuite

01/2018 - 06/2018, Employed | Full-time

Conceived and successfully implemented a workflow for Netsuite, facilitating the adoption of modern development practices. Additionally, developed an open-source CLI, enhancing file handling capabilities within Netsuite.

Bash, Circle Ci, Go, Netsuite, Node Js, Suite Talk

Twitter Data Collection for Network Analysis

01/2015 - 06/2015, Freelance | Part-time

For a social science study on Arab Islamists' connections on Twitter, developed tools to harness tweets using Twitter's Streaming and REST-APIs. Data was stored and subsequently processed to facilitate in-depth network analyses.

AngularJs, GraphQL, MongoDB, Python, TwitterAPI
